Puneet Janganuri

Final-Year Electronics and Communication Engineering Undergraduate | Aspiring Electronics Engineer

+91 895108386 | puneetjanganuri19@gmail.com | linkedin.com/in/puneetjanganure

Education

Bachelor of Engineering in Electronics and Communication Engineering — **Expected Jul 2027**
S.G. Balekundri Institute of Technology, Belagavi — *CGPA: 7.61/10 (Till 6th Semester)*

Diploma in Electronics and Communication Engineering — **Aug 2021 – Jun 2024**
R.N. Shetty Polytechnic, Belagavi — *CGPA: 9.17/10*

Secondary School (SSLC) — **Mar 2021**
St. John's English Medium High School, Belagavi — *84%*

Technical Skills

Programming: C, C++, Python, Verilog HDL
Embedded: Embedded C, Arduino Uno, NodeMCU (ESP8266), 8051
Protocols: UART, SPI, I^2C, PWM, ADC, GPIO
EDA Tools: Vivado, ModelSim, Keil, Proteus, MATLAB, LTspice
Hardware: Digital/Analog Electronics, Sensor Interfacing, PCB Basics, IoT, Circuit Debugging
Tools: Git, GitHub, VS Code

Relevant Coursework

Digital Electronics • Analog Electronics • Embedded Systems • VLSI Design • DSP • Communication Systems • Microprocessors & Microcontrollers • Control Systems • Computer Networks • Embedded C • IoT Fundamentals

Internships

Embedded Systems & IoT Intern — **Jun 2023 – Aug 2023**
Uilatech, Belagavi

- Developed Arduino and NodeMCU based embedded applications.
- Integrated sensors for IoT-based monitoring.
- Performed hardware testing, debugging and firmware validation.
- Collaborated with engineers to deliver embedded solutions.

Embedded Systems & IoT in Medical Devices Intern — **Mar 2024 – Jun 2024**
Saburi Scientific, Goa

- Assisted in embedded firmware development for healthcare devices.
- Integrated sensors and IoT modules for medical applications.
- Conducted testing, troubleshooting and documentation.
- Supported hardware integration and validation.

Projects

Smart Seed Preservation System — Arduino, DHT11, Soil Moisture, Relay

- Built an embedded monitoring system for real-time temperature and humidity.
- Automated environmental control using relay modules.
- Integrated sensors with Arduino to improve storage conditions.

Obstacle Avoiding Car — Arduino, HC-SR04, L298N

- Developed an autonomous obstacle-avoiding robot.
- Implemented ultrasonic sensing and motor control.
- Integrated embedded software with hardware.

Achievements

- First Place in the Project Contest conducted by S.G. Balekundri Institute of Technology, Belagavi for innovation, technical implementation and teamwork.
